

## Percussion Level 1 - Time to play the drums!

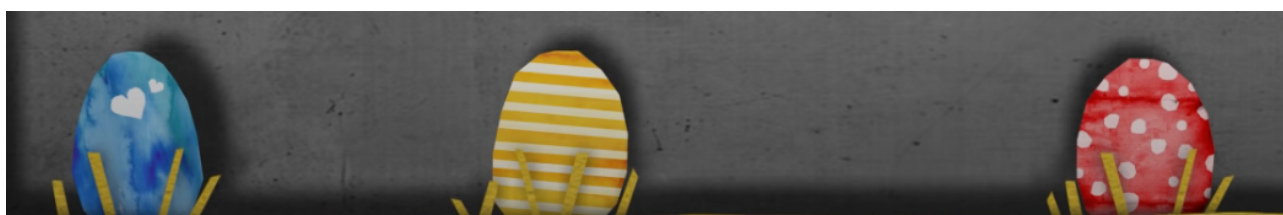

Percussion instruments make a sound when they are struck, shaken, scraped, plucked, or rubbed. It is time for you to get inventive and find objects that could make a good percussive instrument. Ask your parent first!

### Instructions

Each coloured egg needs you to make a different sound!

Choose a sound for each colour! You could choose something to hit, you could clip, clap or choose a sound to make with your mouth, it could even be a word.

When the conductor (who is the little man) lands on the egg you have to make the sound you have given it! You will get a count in of 4. Make sure you stay in time and feel the pulse!

When you are ready, play along to this video:

Need to make it easier?

### Easy version

Just try clapping when the little man lands on the egg.

### Medium version

Get a brother, sister or adult to make the sound of one of the eggs so you only have two to watch out for.
