

Knowledge Testing Cards

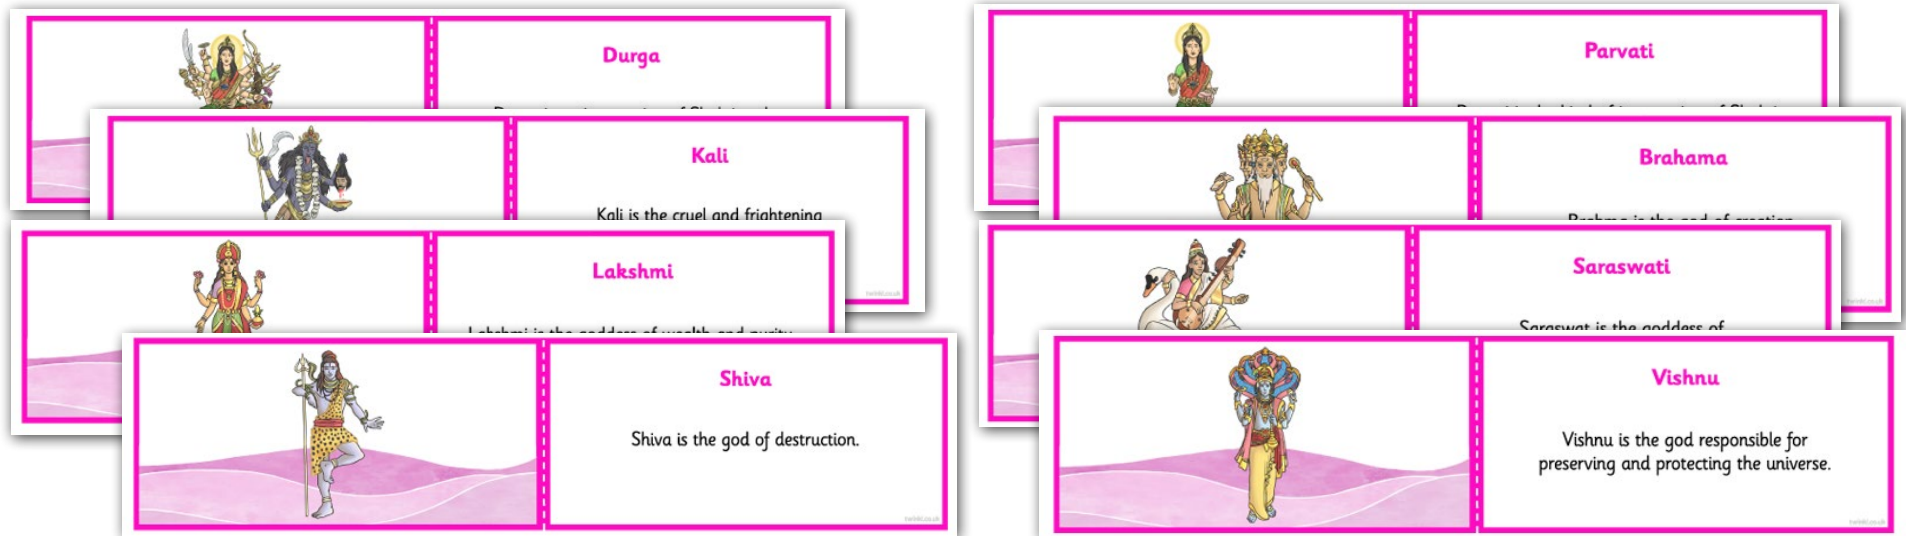

These cards are designed to support children to learn, reinforce and embed key words, ideas and concepts into the long term memory.

They should be used both during the unit and at regular intervals during the rest of the year, to check what has and has not been retained. For this reason, it would be worth laminating these cards.

The cards can be folded down the centre to be made into double sided cards, with a picture on one side and text on the other.

Children should be given the opportunity to test themselves, test a partner or work as part of a group. This activity needs to be short (up to a maximum of 10 minutes).

Suggested times to use: early morning work, lesson starter, end of the day activity.

Brahama

Brahma is the god of creation.

twinkl.co.uk
