

## Music - Percussion Level 2

Dynamics  
the variation in loudness

This time there are 3 different flowers. You need to pick a different sound for each flower. You could hit something, or create a sound with your mouth. Change your dynamics as the music builds and softens.

For the multi coloured flower try and hit 2 at once!

When the bee lands on the flower you need to play the sound that matches that flower.

Once you have done once try it again with different sounds.

**You Tube** <https://youtu.be/bOXFrgB083A>

Need to make it easier?

Easy version

Just try clapping or playing one sound when the bee lands on the flowers.

Medium version

Get a brother, sister or adult to make the sound of one of the flowers so you only have two to watch out for.
