

# All about the Number 12

## Home Learning Challenges

# 12

Can you see the number 12 on this page? Can you trace over the numbers at the bottom of the page? You could try writing the number 12 on your own too.

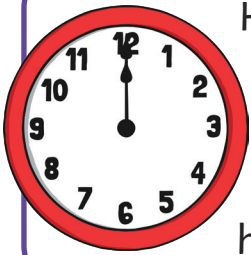

Use a muffin tray or an empty egg box with 12 sections to play a game. Find 12 small objects (such as toys, coins, beads or buttons) and place one object in each space in your tray or box. How many items do you have in total? How many items are in each row? Can you write the number for each item?

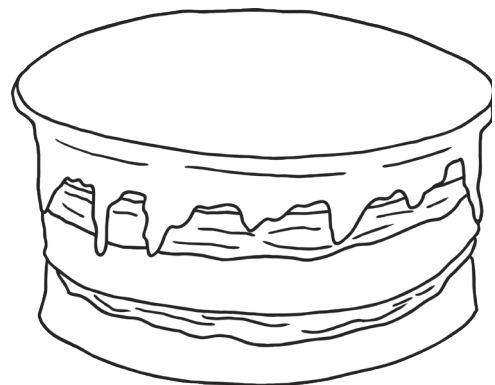

There are 12 months of the year. Have a look at a calendar. Can you count all 12 months? Can you find the month when it is your birthday?

Roll two dice. Can you throw double 6 so that there are 6 spots on the top of each dice? How many spots are there altogether?

Have a look at a clock – can you see the number 12? Where is it? What time is it when both hands point to the 12?

Barry's big brother is going to be 12 on his next birthday. Can you draw 12 candles on the cake?
