Mathematical Dictionary

Year Three

Vocabulary	Definition	Example
Acute angle	An angle that is smaller than a right angle.	
Axis	The horizontal or vertical line on a graph.	
Bar graph	A representation of data in which the frequencies are represented by the height or length of the bars.	
Factor	A whole number that divides exactly into another number without leaving a remainder.	$2 \times 3 = 6$ factor factor
Horizontal	A horizontal line is a straight, level line going across, perpendicular to the vertical.	 Horizontal Line
Irregular	Used to describe shapes that are not regular.	
Kilometre	A measurement of length equal to 1000 metres.	
Millimetre	A millimetre is a measurement of length equal to 1/1000 of a metre. There are 10mm in 1 cm.	
Numeral	A numeral is a symbol (or group of symbols) used to represent a number.	1 = I 2 = II 3 = III 4 = IV 5 = V
