

# Monday - Maths (1)

Today we are going to be looking at doubling numbers.

Doubling means 'adding the same number twice'.

Double 2 means  $2 + 2$ .

Look at the picture to help you.

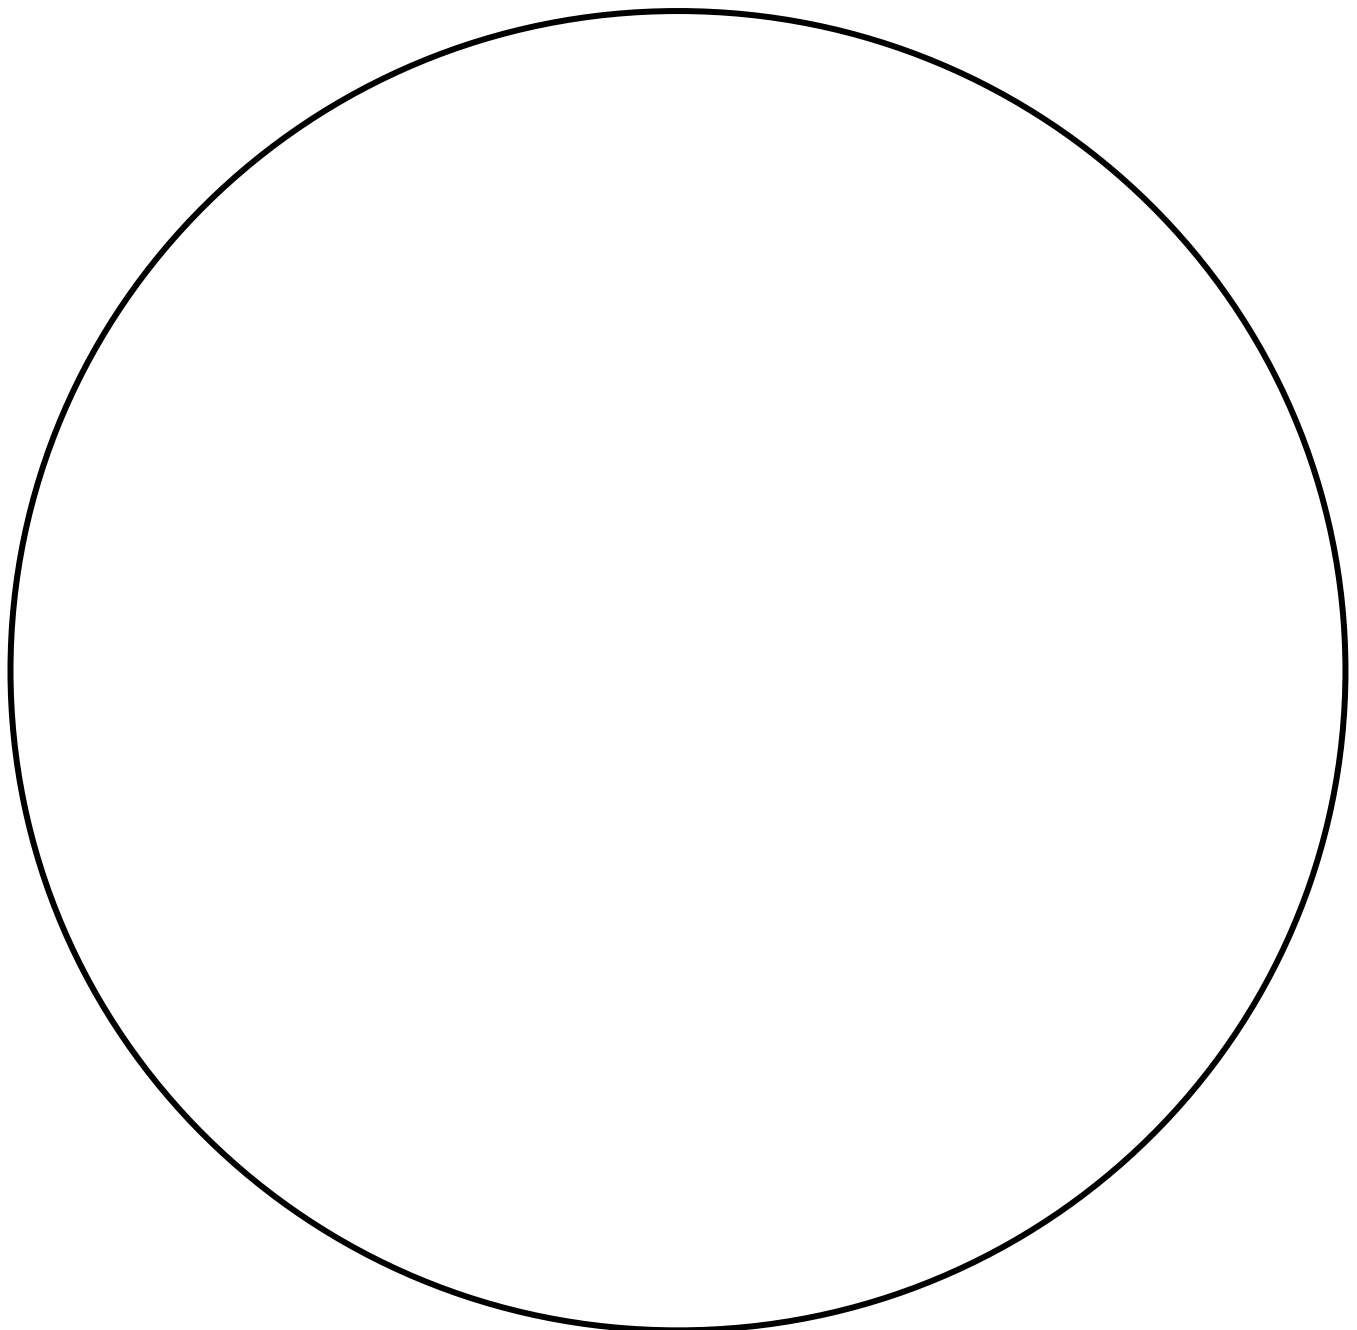

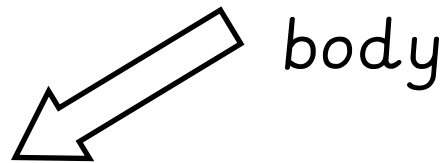

Today we are going to be making doubling ladybirds. You will need scissors, the ladybird template (see next page) and a split pin. See how many doubles you can make up to 10.

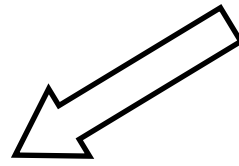

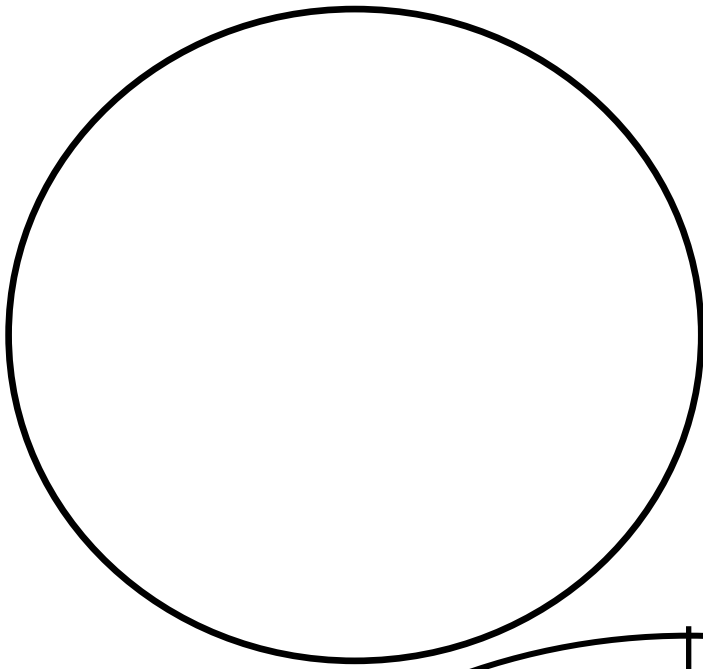

# Monday - Maths (2)

Use the template on the next 2 pages for your head, body and wings. On the wings, you need to draw the same amount of dots of each side. Cut up the middle to make the wings separate. Then, write the number to show the answer on the bottom part of the body. See the picture on the previous page to help you.

# Monday - Maths (3)
