

Science Homework project

Our Summer term Science topics are: 'Living Things and Their Habitats' and 'Field Studies'. For your homework we would like you to create a presentation on a wild animal found within the UK.

You can complete your homework in your own way—you may want to create a fact file, piece of art or a PowerPoint, for example. You may even want to search for your animal, if it is found within the local area, and take a photograph. We would like you to research and learn information about your chosen animal ready to present to the rest of the class.

The deadline for the project to be completed and in school is Friday 23rd June. You will have the opportunity to present during the following week.

Enjoy!
